

## JETCAM SYSTEM

### Quick Connect Centers

The Camera Test Port on the back of the Command Center will help you to trouble-shoot the camera/sonde which will save you time and money.

### Remote Pouch

The remote is mounted on the side of the command module to allow easy access. Save time searching for it!

### Built-In Text-Writer

Simple and easy to use keyboard, it is water resistant for simple cleaning. Add text to the video at any time.

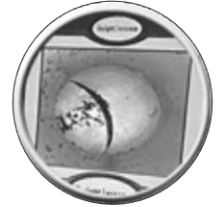

### Jet Nozzle Size

Inspect 6" to 18" with larger skids and choose from 1/2", 3/4" and 1" jet nozzle

### 10.4" LCD Monitor

Large monitor allows for optimum viewing capabilities and inspect even the smallest details with high resolution pictures.

### Manual Reel Drum

Manual reel drum allows maximum flexibility to inspect mainline pipes and sewer.

## Dynamic Jetcam Inspection System

### Mini Coax Cable

Flexible 10 x 22 AWG conductor mini coax cable with composite shielded cable for added protection.
